

Program Assessment Seminar
ED299
Spring 2006

Final Report of ongoing assessment project for Nursing Program
Julia Munkvold

Preparation for Piloting Oregon Consortium of Nursing Education (OCNE)
competencies and rubrics at Lane Community College

For the last ten months I have served on the statewide committee writing rubrics for the OCNE competencies. During these bi-monthly meetings I learned a great deal of rubric development under the guidance and supervision of PSU faculty and other guest advisors. These rubrics are complete and ready to go to schools to pilot.

Lane Nursing program does not start in OCNE formally until 2007, however faculty have chosen to pilot the format in our existent curriculum. The ending of my assessment project will be to meld:

- ☐ existing clinical evaluation objectives
- ☐ OCNE rubrics
- ☐ OCNE competencies and Lane Core Competencies

Even with the one class release for this assessment project the rigors of being half time Nursing Program Coordinator and half time Nursing faculty I have not completed this project. Summer months will allow this completion of rubrics to start in the Fall 2006 for clinical courses.

Copies of the [OCNE Rubrics](#) are finalized however.

I appreciate being part of this Assessment committee/class, and gained much from the experiences of others.
