

Transforming the local community:

A Solar Electric and Vehicle Charging Station project

Transforming the local community:

A Solar Electric and Vehicle Charging Station project

The project's primary goals are as follows:

- Create opportunities for students to learn how to install, repair, and service the solar electric and vehicle infrastructure necessary for our community to establish a lower carbon footprint.
- Generate renewable energy.
- Help transform the local community to use plug-in electric vehicles.

Transforming the local community: Sustain A Solar Electric and Vehicle Charging Station project
