

## Motor Pool / Van Driver Training

Please view the training video online at:

Answer every question; any unanswered questions

counts as a zero. You need a 17 or better to pass. Be sure to complete all the information requested on the final page.

1. Average reaction time is: <input type="checkbox"/> 3 seconds. <input type="checkbox"/> 3/4 of a second. <input type="checkbox"/> 3-5 seconds. <input type="checkbox"/> 4 seconds.
2. Compared to a passenger car, a van's following distance should: <input type="checkbox"/> be greater, but only in adverse weather. <input type="checkbox"/> never be more than 3 seconds. <input type="checkbox"/> be the same. <input type="checkbox"/> be greater in both ideal and adverse conditions.
3. Hydroplaning: <input type="checkbox"/> can occur any time the roadway is wet and at speeds as low as 35 mph. <input type="checkbox"/> will not occur if your tires are properly inflated & have proper tread depth. <input type="checkbox"/> is rarely a problem because vans are heavy. <input type="checkbox"/> occurs only in heavy rains and at high speed.
4. If a jaywalker is waiting to cross the street at mid-block, you should: <input type="checkbox"/> stop and wave the pedestrian across, but only when you are sure all other traffic is stopped. <input type="checkbox"/> stop and let the pedestrian cross in front of you. <input type="checkbox"/> put on your hazard lights to warn other drivers, then allow the pedestrian to cross. <input type="checkbox"/> cover the brake to be ready to stop if the pedestrian crosses in front of you.
5. In adverse weather: <input type="checkbox"/> following distances should be less. <input type="checkbox"/> following distances shouldn't change. <input type="checkbox"/> stopping distances are the same. <input type="checkbox"/> stopping distances are greater.
6. In ideal conditions, it is recommended that you follow no closer than ____ behind the vehicle ahead. <input type="checkbox"/> 2 seconds <input type="checkbox"/> 4 seconds <input type="checkbox"/> 3 seconds <input type="checkbox"/> two vehicle lengths
7. Properly adjusted mirrors will: <input type="checkbox"/> eliminate all blind spots. <input type="checkbox"/> eliminate all side collisions. <input type="checkbox"/> make you more visible to other drivers. <input type="checkbox"/> reduce your blind spots.

<p>8. Safety belts:</p> <ul style="list-style-type: none"> <li><input type="checkbox"/> aren't necessary to wear if not required by your organization.</li> <li><input type="checkbox"/> are effective in reducing injury only in high-speed crashes.</li> <li><input type="checkbox"/> are required for the driver and all passengers.</li> <li><input type="checkbox"/> are optional when transporting cargo.</li> </ul>
<p>9. The maximum speed when driving a van is:</p> <ul style="list-style-type: none"> <li><input type="checkbox"/> 45 mph</li> <li><input type="checkbox"/> posted speed</li> <li><input type="checkbox"/> 55 mph</li> <li><input type="checkbox"/> 65 mph</li> </ul>
<p>10. When driving at night, it is recommended that you do all of the following EXCEPT:</p> <ul style="list-style-type: none"> <li><input type="checkbox"/> immediately pass erratic drivers who may be impaired.</li> <li><input type="checkbox"/> look to the right edge of the road to avoid being blinded by headlights of oncoming vehicles.</li> <li><input type="checkbox"/> reduce your speed.</li> <li><input type="checkbox"/> use your high beams whenever it is safe and legal to do so.</li> </ul>
<p>11. When driving in the city, you should scan:</p> <ul style="list-style-type: none"> <li><input type="checkbox"/> 1 to 1.5 blocks ahead.</li> <li><input type="checkbox"/> scanning in the city is not recommended.</li> <li><input type="checkbox"/> only to the vehicle ahead.</li> <li><input type="checkbox"/> every 3-5 seconds.</li> </ul>
<p>12. When driving in the rain and/or other adverse weather conditions:</p> <ul style="list-style-type: none"> <li><input type="checkbox"/> you should increase your following distance.</li> <li><input type="checkbox"/> you should drive as you would in ideal conditions.</li> <li><input type="checkbox"/> you should brake harder to compensate for the increased stopping distance.</li> <li><input type="checkbox"/> it is safe to travel at the posted speed limit.</li> </ul>
<p>13. When driving on the highway, you should scan:</p> <ul style="list-style-type: none"> <li><input type="checkbox"/> every 3-5 seconds.</li> <li><input type="checkbox"/> one mile down the road.</li> <li><input type="checkbox"/> only to the next vehicle.</li> <li><input type="checkbox"/> 12-15 seconds down the road.</li> </ul>
<p>14. When stopped at an intersection, you should do all of the following EXCEPT:</p> <ul style="list-style-type: none"> <li><input type="checkbox"/> stop before the crosswalk.</li> <li><input type="checkbox"/> stop behind the stop line.</li> <li><input type="checkbox"/> leave space between you and the vehicle ahead.</li> <li><input type="checkbox"/> back up immediately if you stop in the crosswalk.</li> </ul>
<p>15. When using a helper to back, which of the following statements is not correct:</p> <ul style="list-style-type: none"> <li><input type="checkbox"/> Roll down your window and turn off all radios so you can hear any warnings.</li> <li><input type="checkbox"/> Agree on hand signals before backing.</li> <li><input type="checkbox"/> Make sure the helper is out of the backing path and visible in your mirror.</li> <li><input type="checkbox"/> It is the helper's responsibility to make sure you back safely.</li> </ul>
<p>16. When you must back your van, it is best to:</p> <ul style="list-style-type: none"> <li><input type="checkbox"/> place the spotter in the path of the van.</li> <li><input type="checkbox"/> back to the passenger's side whenever possible.</li> <li><input type="checkbox"/> back to the driver's side whenever possible.</li> <li><input type="checkbox"/> avoid using a spotter.</li> </ul>

<p>17. Which one of the following does not apply to vans?</p> <ul style="list-style-type: none"> <li><input type="checkbox"/> They are usually more affected by crosswinds.</li> <li><input type="checkbox"/> They usually have larger blind spots.</li> <li><input type="checkbox"/> They usually have shorter stopping distances.</li> <li><input type="checkbox"/> They usually have a higher center of gravity.</li> </ul>
<p>18. While driving, you should:</p> <ul style="list-style-type: none"> <li><input type="checkbox"/> place clipboards and/or other important papers on the engine cover so you can reach them easily.</li> <li><input type="checkbox"/> none of the other answers are correct.</li> <li><input type="checkbox"/> adjust your seat forward or back to reduce the size of your blind spot.</li> <li><input type="checkbox"/> lean in your seat to reduce the size of your blind spot.</li> </ul>
<p>19. While on the road, you should check your mirrors:</p> <ul style="list-style-type: none"> <li><input type="checkbox"/> every 12-15 seconds.</li> <li><input type="checkbox"/> every 3-5 seconds.</li> <li><input type="checkbox"/> every quarter mile.</li> <li><input type="checkbox"/> every 3-5 blocks.</li> </ul>
<p>20. While waiting to make a left turn at an intersection:</p> <ul style="list-style-type: none"> <li><input type="checkbox"/> wait with your foot over the accelerator to reduce your reaction time so you can shoot through a small break in traffic.</li> <li><input type="checkbox"/> wait with your wheels straight.</li> <li><input type="checkbox"/> wait with your wheels turned in the direction you wish to go.</li> <li><input type="checkbox"/> try to time the light change by concentrating.</li> </ul>
