USING THE INTERNET

Where can I use the Internet if I don't have it at home?
At the LCC Library or computer labs, or your local public library.

What is an web browser?
A web browser is a software program you use to view files on the World Wide Web. Internet Explorer and Mozilla Firefox are the most popular browsers. In a browser, you can click on *hyperlinks* (links) to jump into another page. These linked pages may be written by the original page's author, by others in the organization, or other pages written by complete strangers in remote parts of the globe.

How do I find websites on my topic?
Use a search engine, such as www.google.com or www.yahoo.com. Type in words that describe what you are looking for, then hit the Enter button on your keyboard.

What is a URL?
You've probably seen strings of letters and other symbols beginning with **http://** or **www** in advertisements. These are called *URLs* or uniform resource locators. They are addresses on the web. You can type them into the address bar of your web browser to get to a certain webpage. Each page on the web has a distinct URL.

What is a homepage?
A homepage is an introductory webpage, similar to a table of contents, that offers links to other webpages on the same website.

What's a top-level domain name?
It is the last two or three letters in the URL of a homepage. It indicates the type of organization that has put this webpage up. You might see .com, .org, .mil, or .gov. .Edu is pretty obviously from an **edu**cational institution, and sometimes the webpages with the best information can come from .edu websites, but not always. Here are what some of the others stand for:

Top-Level Domain Name	Example
• **gov** - Government agencies • **org** - Organizations (nonprofit) • **edu** - Educational organizations • **mil** - Military • **com** - commercial business • **net** - Network organizations • **ca** - Canada • **uk** - United Kingdom	• http://www.nasa.gov • http://www.nra.org • http://www.uoregon.edu • http://www.army.mil • http://www.pepsi.com • http://www.earthlink.net • http://www.banffcentre.ca • http://www.royal.gov.uk

USING A SEARCH ENGINE

1.   Go to the **Google** search engine at www.google.com. Find one website or page on any musician or musical group.

Musician/Group: _____

How many results did you find? _____

URL for one of the websites you found:

http: //_____

Provide some details from the site about your musical group or performer.

_____

_____

_____

2.   Using the **Google** search engine, find out who or what is **Andoque**?

Answer:_____

_____

3.   The **Friendly Area Neighbors** are a neighborhood organization in Eugene. The area was named after a well-known individual from early Eugene history. Who was this?

Answer:_____

_____

URL: http://_____

FINDING URLs

For the following questions, you will search the Internet by going directly to a URL (a web address). Click on the current URL in the white **Location or Address bar** at the top of your browser and press the delete or back arrow keys. You'll see the letters in the box erase. Type your URL in this space and press Enter. You don't need to type http://.

1.   Take a look at the FBI's home page. This is **www.fbi.gov/** Name one of the **Top Ten Most Wanted**.

Answer:_____

2.   Try the Urban Legends Archive at **www.snopes.com/** Briefly describe one legend you found.

Answer:_____

_____

_____

3.   Go to the Internet Movie database at **imdb.com/**   Find the movie **Young Frankenstein**. Who played Igor?

Answer:_____

LAST QUESTION

Go to the LCC Library home page and click on the little **Site Map** link at the top right part of the screen. Find something interesting about the LCC Library you didn't know and write about it.

Answer:_____

_____

_____

URL: http://_____
