DEPARTMENT: Computer Information Technology
PROGRAM: Service Courses

INITIATIVE TITLE: Packet-based CIS 140S Course   <u>Priority: 12</u>

DESCRIPTION:
>We need to create a packet-based CIS 140S Operating Environments: Windows course. Students could then choose whether to take the one-credit lecture based version or the packet-based version. CIS 140S is a requirement for the Graphic Design and Multimedia Design & Production programs. Approximately 100 students take this class each year. The students could use their home computer or those in the CIT Main lab (building 19, room 135) to accomplish the lab activities. This course would allow those students who choose to do the work at their own pace.

RESOURCES NEEDED:
>Curriculum development funds would be required to develop the course. There would be no addition cost for software or equipment.
>100 hours @ $25.94 = $2594

FUNDING SOURCES:
>Curriculum development funds

ORG & PROG codes (of FOAP):

How does this project articulate with college's Vision, Mission, & Goals and contribute toward meeting the President's/Board's approved goals?
>This project benefits the Graphic Design and Multimedia Design & Production professional technical programs. It meets the learning and innovation core values.
