This section contains nine reports presenting data for *all students*, for students by *enrollment status* (e.g., part- and full-time), and for students by *credit hour status* (0 to 29 and 30+ credits).

The first report, on page B1, is a **Summary Table** of scores for *all students* on each of the five benchmarks: 1) Active and Collaborative Learning, 2) Student Effort, 3) Academic Challenge, 4) Student-Faculty Interactions, and 5) Support for Learners for your institution, a comparison group, and all *CCSSE* 2005 colleges.

The **2005** *CCSSE* Benchmark Deciles Report, on page B2, highlights the five benchmark deciles for *all students* at your institution. Deciles are percentile scores that divide the frequency of benchmark scores into ten equal groups. A percentile represents the point at or below which a specified percentage of the college benchmark scores fall. For example, the 60th percentile represents the point at or below which 60 percent of the college benchmark scores fall for the respective comparison group. Deciles are listed for the entire 2005 participating group of colleges and for each appropriate breakdown according to college size and urbanicity. To help you gauge your college's performance relative to the comparison groups, the shaded area on the tables indicate the deciles that are less than or equal to your benchmark scores.

The third report – **Bar Charts and Benchmark Item Composition** - uses bar charts to represent the data provided in the summary table, for *all students* for each benchmark (pp. B3 - B7). In addition, it provides a listing of items from *The Community College Student Report* making up that particular benchmark (e.g., Active and Collaborative Learning).

The next series of reports, found on pages B8 through B14, contain the same reports described above broken down by *enrollment status* for your institution, a comparison group, and all *CCSSE* 2005 colleges.

The final set of reports, pages B15 through B21, highlight data for all students by *credit hour status* for your institution, a comparison group, and all *CCSSE* 2005 colleges.

Benchmark Score: Each benchmark score was computed by averaging the scores on survey items that comprise that benchmark. To compensate for disproportionately large numbers of full-time students in the sample, all means used in the creation of the benchmarks are weighted by full- and part-time status. Benchmark scores are standardized so that the weighted mean across all students is 50 and the standard deviation across all participating students is 25. Institutions' benchmark scores are computed by taking the weighted average of their students' standardized scores.

Score Difference: The result of subtracting the comparison group score (same size colleges or 2005 colleges) from your college's score on each benchmark.

Active and Collaborative Learning Bar Charts and Benchmark Item Composition All Students

Description - Students learn more when they are actively involved in their education and have opportunities to think about and apply what they are learning in different settings. Through collaborating with others to solve problems or master challenging content, students develop valuable skills that prepare them to deal with the kinds of situations and problems they will encounter in the workplace, the community, and their personal lives.

Active and Collaborative Learning Bar Charts and Benchmark Item Composition Enrollment Status Breakout

Description - Students learn more when they are actively involved in their education and have opportunities to think about and apply what they are learning in different settings. Through collaborating with others to solve problems or master challenging content, students develop valuable skills that prepare them to deal with the kinds of situations and problems they will encounter in the workplace, the community, and their personal lives.

Academic Challenge Bar Charts and Benchmark Item Composition Enrollment Status Breakout

Description - Challenging intellectual and creative work is central to student learning and collegiate quality. Ten survey items address the nature and amount of assigned academic work, the complexity of cognitive tasks presented to students, and the standards faculty members use to evaluate student performance.

Benchmark Score: Each benchmark score was computed by averaging the scores on survey items that comprise that benchmark. To compensate for disproportionately large numbers of full-time students in the sample, all means used in the creation of the benchmarks are weighted by full- and part-time status. Benchmark scores are standardized so that the weighted mean across all students is 50 and the standard deviation across all participating students is 25. Institutions' benchmark scores are computed by taking the weighted average of their students' standardized scores.

Score Difference: The result of subtracting the comparison group score (same size colleges or 2005 colleges) from your college's score on each benchmark.

2005 CCSSE Benchmark Deciles

Credit Hour Status Breakout

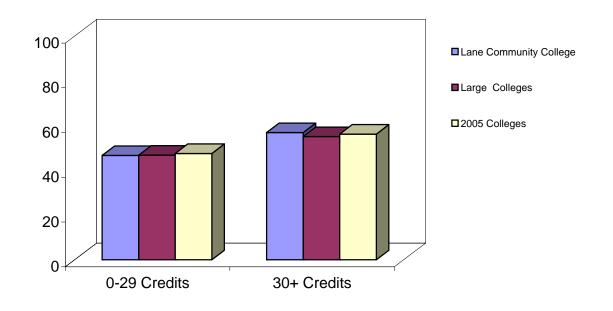

Lane Community College

These tables present the range of institutional scores by decile for the five benchmarks of effective educational practice for both students with 0 to 29 credits and students with 30 or more credits. Deciles are percentile scores that divide the frequency of benchmark scores into ten equal groups. Deciles are listed for the entire 2005 participating group of colleges and for each appropriate breakdown according to college size and college urbanicity. A percentile represents the point at or below which a specified percentage of the college benchmark scores fall. For example, the 60th percentile represents the point at or below which 60 percent of the college benchmark scores fall for the respective comparison group. To help you gauge your college's performance relative to the comparison groups, the shaded areas on the national, size, or urbanicity tables indicate the deciles that are less than or equal to your benchmark score.
