

First Week Scavenger Hunt

name: _____

1. Collect the printed names and signatures of 3 classmates who sit near you.

printed names

signatures

2. Sometime soon *after* the first Monday of the term, go to the reception area of the Math Resource Center, room 169. The staff here can help you check out a video tape related to almost any topic or problem type you will encounter in this course. Surrounding the reception area, there are video viewing rooms, testing rooms, and study rooms where instructional assistants are available to help with homework questions. Somewhere in the MRC, there is a rubber stamp and ink pad next to a stack of orientation maps. Take a map, and stamp this space:
3. As long as you are exploring the building, take note of three other important locations: Rich Freund's office (room 162L), Shirley Lukacs' office (room 162 M), and the Main Math Office.

Rich Freund is a Counselor/Academic Advisor and Shirley Lukacs is an Academic Advisor. They are the best people to talk to if you have a question about which math class to take, or other questions regarding registration, schedule planning, etc. Math Office staff are usually the best source for information about the math department. They will lend you a calculator if you have forgotten yours. The Office also serves as "lost and found" for items left in math classrooms.

What is the room number of the Math Office? _____

4. Finally, find my office (the room number is listed on your course syllabus, along with office hours when you can stop by for assistance with homework or other concerns). Place your completed Scavenger Hunt in the manila envelope taped to the door or posted nearby. **Sign (legibly please) the envelope.**
